Re: City Water Bills

Dear Mr. Blackledge,  
I tried to respond in detail to your request of copies of water bills but apparently failed to completely respond to your request.

The only method by which the town has to release the requested information is outlined in my earlier letter. The town is not going to set up the computer program you suggested. The town clerk has many other tasks to perform and the Town must comply with federal and state law to protect the identity and privacy for the accounts of all residents and customers of the town. Your request for electronic copies of water bills is not possible.

**Please understand, the town board has an established policy for requesting copies of public records and that is the only procedure by which copies of public documents will be provided!**

Yours very truly,

E.W. "Bill" Shaw
